    - **Vedanshi:** GPS tracker
    - **Suho:** Visualize car size
- Figure out who wants to do which idea

Assignments coming up:
- **Ideas2:** Due: Tuesday, September 17, 2024, 11:59 PM

Meeting notes:
- Ideas we are most passionate about: 1 each
    - **Vedanshi's Idea:** Horizon Tracker
        - A durable, compact GPS tracker that lets divers and paragliders trace their paths, offers safety features for emergencies, and withstands extreme underwater or airborne conditions.
    - **Hsin-Chen:** Cross-country camping planner
        - Description: Route planning: connecting different camp sites, Fee calculator: attraction day pass and campground fees, Water & power access, Wildfire or other natural hazard warning and visitor report
    - **Suho:** Car Visualizer
        - Online purchasing made everyone and everything much easier, nowadays purchasing a car online is not a rare occasion. Some people prefer to buy a car at the store to identify the size, volume, and overall aesthetics. MCHM is an app that narrows the gap between online and

offline purchasing by providing a lining of a virtual model for your perfect-sized car. Don't imagine you in the car, see it for yourself.

- **Nett:** ClearEye
  - A browser extension designed to block websites with mostly AI generated content from search results.
- We finalized on doing Horizon Tracker as we were all interested and passionate about it.
- We plan to 3d print the mvp - **vedanshi and suho**
- We plan to create a 3d model in something like docker with a logo - **hsin-chen and nett**

Action items:
- Submit ideas2 individually and mention the idea and tweet in the file in folder so that we are all on the same page
